

These data refer to applicants in the “2023/24 cycle” who applied in 2023 for the Oxford MBIOL course starting in 2024 or in 2025 (deferred entry). In total there were 731 applications. After shortlisting, 335 applicants were invited to attend a remote interview. After interviews took place, 129 offers for entry in 2024 were made, including 16 open offers (where a place is guaranteed if the offer conditions are achieved but the college place will be allocated before the end of August 2024). In addition to this 1 deferred offer was made for entry to the course in 2025.

The UCAS forms of all applicants were read and graded. Overall the standard of applications was very high and all candidates who obtained an interview were interviewed by two colleges. The tutors at the Queen's College note that the performance of all candidates who interviewed at Queen's was strong and that decisions about offering places were based all information, including the UCAS form and interview performance. We cannot provide personalised feedback on individual applications or interview performance.
